STRETCH TENTS

Stretch tents are quick to install, good looking and adapt to almost any location – whether free standing or attached to an existing structure. Our tents are made in our own specialist manufacturing facility, which offers us on-site quality control and offers you competitive pricing. We can also arrange a structural engineering certificate to give you – and your guests or customers – peace of mind.

Our tents come in beige, white or red and are available in a range of sizes, configurations and materials to offer the perfect fit for your needs – whether it's a garden party, wedding, festival, corporate function or even a semi-permanent structure. Our stretch tents are truly versatile: they cover a variety of functions across range of sizes, and they do so in style – and safety. Choose from any of the following options.

COLOUR

Beige
